

Test Result Reporting

Outpatient/Referred Specimen Reporting

Results for outpatients and/or referred specimens can be reported by electronic results reporting system, auto faxing, auto-send printer, network printer, courier, or mailed.

Printers can be set up to print at requested scheduled times according to client needs.

Clients can request calling or faxing of results by indicating on the requisition and providing the telephone number to call or fax. Please include area code when providing the telephone number.

To meet HIPAA requirements, all fax numbers must be verified by the client prior to transmitting any PHI.
