

## 190.23 - Lipids Testing

### Description

Lipoproteins are a class of heterogeneous particles of varying sizes and densities containing lipid and protein. These lipoproteins include cholesterol esters and free cholesterol, triglycerides, phospholipids and A, C, and E apoproteins. Total cholesterol comprises all the cholesterol found in various lipoproteins.

Factors that affect blood cholesterol levels include age, sex, body weight, diet, alcohol and tobacco use, exercise, genetic factors, family history, medications, menopausal status, the use of hormone replacement therapy, and chronic disorders such as hypothyroidism, obstructive liver disease, pancreatic disease (including diabetes), and kidney disease.

In many individuals, an elevated blood cholesterol level constitutes an increased risk of developing coronary artery disease. Blood levels of total cholesterol and various fractions of cholesterol, especially low density lipoprotein cholesterol (LDL -C) and high density lipoprotein cholesterol (HDL-C) are useful in assessing and monitoring treatment for that risk in patients with cardiovascular and related diseases. Blood levels of the above cholesterol components including triglyceride have been separated into desirable, borderline and high-risk categories by the National Heart, Lung, and Blood Institute in their report in 1993. These categories form a useful basis for evaluation and treatment of patients with hyperlipidemia. Therapy to reduce these risk parameters includes diet, exercise and medication, and fat weight loss, which is particularly powerful when combined with diet and exercise.

### HCPCS Codes (Alphanumeric, CPT® AMA)

| Code  | Description                                                                                                                                                                    |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 80061 | Lipid panel                                                                                                                                                                    |
| 82465 | Cholesterol, serum or whole blood, total                                                                                                                                       |
| 83700 | Lipoprotein, blood; electrophoretic separation and quantitation                                                                                                                |
| 83701 | Lipoprotein blood; high resolution fractionation and quantitation of lipoproteins including lipoprotein subclasses when performed (e.g., electrophoresis, ultracentrifugation) |
| 83704 | Lipoprotein, blood; quantitation of lipoprotein particle numbers and lipoprotein particle subclasses                                                                           |
| 83718 | Lipoprotein, direct measurement; high density cholesterol (HDL cholesterol)                                                                                                    |
| 83721 | Lipoprotein, direct measurement, LDL cholesterol                                                                                                                               |
| 84478 | Triglycerides                                                                                                                                                                  |

### ICD-10-CM Codes Covered by Medicare Program

The ICD-10-CM codes in the table below can be viewed on CMS' website as part of

**Medicare National Coverage Determinations (NCD)  
Coding Policy Manual and Change Report (ICD-10-CM)**

| Code   | Description                                                                        |
|--------|------------------------------------------------------------------------------------|
| B25.2  | Cytomegaloviral pancreatitis                                                       |
| B52.0  | Plasmodium malariae malaria with nephropathy                                       |
| E00.0  | Congenital iodine-deficiency syndrome, neurological type                           |
| E00.1  | Congenital iodine-deficiency syndrome, myxedematous type                           |
| E00.2  | Congenital iodine-deficiency syndrome, mixed type                                  |
| E00.9  | Congenital iodine-deficiency syndrome, unspecified                                 |
| E01.8  | Other iodine-deficiency related thyroid disorders and allied conditions            |
| E02    | Subclinical iodine-deficiency hypothyroidism                                       |
| E03.0  | Congenital hypothyroidism with diffuse goiter                                      |
| E03.1  | Congenital hypothyroidism without goiter                                           |
| E03.2  | Hypothyroidism due to medicaments and other exogenous substances                   |
| E03.3  | Postinfectious hypothyroidism                                                      |
| E03.4  | Atrophy of thyroid (acquired)                                                      |
| E03.8  | Other specified hypothyroidism                                                     |
| E03.9  | Hypothyroidism, unspecified                                                        |
| E05.00 | Thyrotoxicosis with diffuse goiter without thyrotoxic crisis or storm              |
| E05.01 | Thyrotoxicosis with diffuse goiter with thyrotoxic crisis or storm                 |
| E05.10 | Thyrotoxicosis with toxic single thyroid nodule without thyrotoxic crisis or storm |
| E05.11 | Thyrotoxicosis with toxic single thyroid nodule with thyrotoxic crisis or storm    |
| E05.20 | Thyrotoxicosis with toxic multinodular goiter without thyrotoxic crisis or storm   |
| E05.21 | Thyrotoxicosis with toxic multinodular goiter with thyrotoxic crisis or storm      |
| E05.30 | Thyrotoxicosis from ectopic thyroid tissue without thyrotoxic crisis or storm      |
| E05.31 | Thyrotoxicosis from ectopic thyroid tissue with thyrotoxic crisis or storm         |
| E05.40 | Thyrotoxicosis factitia without thyrotoxic crisis or storm                         |
| E05.41 | Thyrotoxicosis factitia with thyrotoxic crisis or storm                            |
| E05.80 | Other thyrotoxicosis without thyrotoxic crisis or storm                            |
| E05.81 | Other thyrotoxicosis with thyrotoxic crisis or storm                               |
| E05.90 | Thyrotoxicosis, unspecified without thyrotoxic crisis or storm                     |
| E05.91 | Thyrotoxicosis, unspecified with thyrotoxic crisis or storm                        |
| E06.0  | Acute thyroiditis                                                                  |
| E06.1  | Subacute thyroiditis                                                               |
| E06.2  | Chronic thyroiditis with transient thyrotoxicosis                                  |
| E06.3  | Autoimmune thyroiditis                                                             |

### **Indications**

The medical community recognizes lipid testing as appropriate for evaluating atherosclerotic cardiovascular disease. Conditions in which lipid testing may be indicated include:

- Assessment of patients with atherosclerotic cardiovascular disease
- Evaluation of primary dyslipidemia
- Any form of atherosclerotic disease, or any disease leading to the formation of atherosclerotic disease
- Diagnostic evaluation of diseases associated with altered lipid metabolism, such as: nephrotic syndrome, pancreatitis, hepatic disease, and hypo and hyperthyroidism
- Secondary dyslipidemia, including diabetes mellitus, disorders of gastrointestinal absorption, chronic renal failure
- Signs or symptoms of dyslipidemias, such as skin lesions
- As follow-up to the initial screen for coronary heart disease (total cholesterol + HDL cholesterol) when total cholesterol is determined to be high (>240 mg/dL), or borderline-high (200-240 mg/dL) plus two or more coronary heart disease risk factors, or an HDL cholesterol <35 mg/dL.

To monitor the progress of patients on anti-lipid dietary management and pharmacologic therapy for the treatment of elevated blood lipid disorders, total cholesterol, HDL cholesterol and LDL cholesterol may be used. Triglycerides may be obtained if this lipid fraction is also elevated or if the patient is put on drugs (for example, thiazide diuretics, beta blockers, estrogens, glucocorticoids, and tamoxifen) which may raise the triglyceride level.

When monitoring long-term anti-lipid dietary or pharmacologic therapy and when following patients with borderline high total or LDL cholesterol levels, it may be reasonable to perform the lipid panel annually. A lipid panel at a yearly interval will usually be adequate while measurement of the serum total cholesterol or a measured LDL should suffice for interim visits if the patient does not have hypertriglyceridemia.

Any one component of the panel or a measured LDL may be reasonable and necessary up to six times the first year for monitoring dietary or pharmacologic therapy. More frequent total cholesterol HDL cholesterol, LDL cholesterol and triglyceride testing may be indicated for marked elevations or for changes to anti-lipid therapy due to inadequate initial patient response to dietary or pharmacologic therapy. The LDL cholesterol or total cholesterol may be measured three times yearly after treatment goals have been achieved.

Electrophoretic or other quantitation of lipoproteins may be indicated if the patient has a primary disorder of lipid metabolism.

Effective January 1, 2005, the Medicare law expanded coverage to cardiovascular screening services. Several of the procedures included in this NCD may be covered for screening purposes subject to specified frequencies. See 42 CFR 410.17 and section 100, chapter 18, of the Claims Processing Manual, for a full description of this benefit.

### **Limitations**

Lipid panel and hepatic panel testing may be used for patients with severe psoriasis which has not responded to conventional therapy and for which the retinoid etretinate has been prescribed and who have developed hyperlipidemia or hepatic toxicity. Specific examples include erythrodermia and generalized pustular type and psoriasis associated with arthritis. Routine screening and prophylactic testing for lipid disorder are not covered by Medicare. While lipid screening may be medically appropriate, Medicare by statute does not pay for it. Lipid testing in asymptomatic individuals is considered to be screening regardless of the presence of other risk factors such as family history, tobacco use, etc.

Once a diagnosis is established, one or several specific tests are usually adequate for monitoring the course of the disease. Less specific diagnoses (for example, other chest pain) alone do not support medical necessity of these tests.

When monitoring long-term anti-lipid dietary or pharmacologic therapy and when following patients with borderline high total or LDL cholesterol levels, it is reasonable to perform the lipid panel annually. A lipid panel at a yearly interval will usually be adequate while measurement of the serum total cholesterol or a measured LDL should suffice for interim visits if the patient does not have hypertriglyceridemia.

Any one component of the panel or a measured LDL may be medically necessary up to six times the first year for monitoring dietary or pharmacologic therapy. More frequent total cholesterol HDL cholesterol, LDL cholesterol and triglyceride testing may be indicated for marked elevations or for changes to anti-lipid therapy due to inadequate initial patient response to dietary or pharmacologic therapy. The LDL cholesterol or total cholesterol may be measured three times yearly after treatment goals have been achieved.

If no dietary or pharmacological therapy is advised, monitoring is not necessary.

When evaluating non-specific chronic abnormalities of the liver (for example, elevations of transaminase, alkaline phosphatase, abnormal imaging studies, etc.), a lipid panel would generally not be indicated more than twice per year.

### **ICD-10-CM Codes That Do Not Support Medical Necessity**

Any ICD-10-CM code not listed in either of the ICD-10-CM covered or non-covered sections.
